

PRODUCT SHEET CLOSURES

HighFlow

amkFa / HF Tap

- Especially designed for industrial applications (motor oil and other automotive products, detergent...) and for refill system (non food applications)
- Variable flow ON / OFF
- Large flow rate

Features

- Tamper evident
- Multiple dispensing tap
- Connectable solution
- Opened by hand
- Opened with tool
- Use by gravity

Materials & Colours

Tap material: HDPE and PP
 Spout material: LDPE
 Tap colours: White
 Spout colours: Ivory
 Spout weight * ~ 6,1g
 Tap weight * ~ 24,3g
 * Typical value

Heat resistance

- Ambient T°C
- Hot filling conditions
- Chemical sterilisation
- Steam sterilisation

Capping position	1 st *	2 nd *	Test ref
Uncapping force (kgf)	5-15	NA	Smurfit Westrock method
Recapping force (kgf)	NA	15-35	Smurfit Westrock method
Tightness (bar)	NA	0.3	Smurfit Westrock method

* Typical values at 20°C

OTR : typical average for tap ~ 0.14cm³ per day, 21% oxygen, 50% relative humidity, at room temperature (22 ± 2°C)

Minimum flow rate : 18L (±0.5L) per minute (volume of water taken to dispense with an open to air, constant head height of 175 mm)

Disclaimer : The information given on this product sheet is supplied in good faith and does not comprise a warranty of any kind either expressed or implied. It is the customer's responsibility to test the suitability of this product for their specific application.

*(Typical dimensions provided for information purpose
 Non binding and not to be considered as part as our technical specifications)
 1st notch -> empty bag
 2nd notch -> filled bag*

APPLICATIONS / FILLING *:		
<input checked="" type="checkbox"/> Clean	<input type="checkbox"/> Hot filling	<input type="checkbox"/> Aseptic
* Please look at the suitable GMP guides available for these applications
