

Turn-Tap

Reliability

PERFECT FOR HIGH DENSITY PRODUCTS

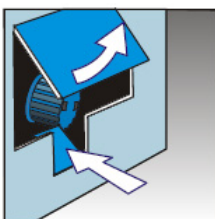

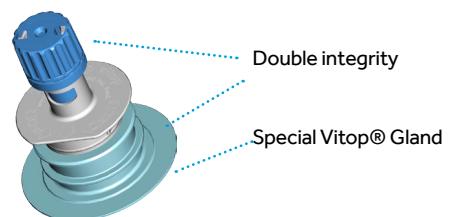

The patented Turn-tap enables easy dispensing of a high density product from a Bag-in-Box® thanks to its high flow rate. It is perfectly suited for detergent application due to its resistance to stress cracking - a phenomenon that can happen on bags filled with high density products. Also, it fits perfectly with the widespread Vitop® spout - the leading spout on the wine market with over 3 billion pieces sold.

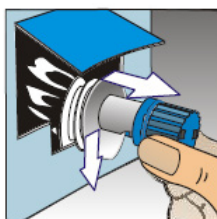

Benefits

Advantages of Turn-Tap

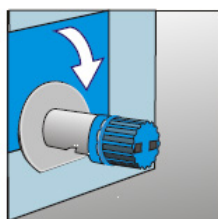

- 1** **SAFE:** Tamper evident/safety collar. Meets FDA and EU Food Contact legislation requirements. Excellent oxygen barrier.
- 2** **EASY USE:** Simple turning of the tap is enough to pour the liquid. Tamper evident lid can be easily removed for an immediate use and the drop-free system ensures a clean pouring.
